

TERMS OF ACCEPTANCE

When a person seeks chiropractic health care and we accept that person for such care, it is essential for both to be working towards the same objective.

The goal of chiropractic is to correct vertebral subluxations. It is important that each person understand both the objective and the method that will be used to attain this goal. This will prevent any confusion or disappointment.

Adjustment: An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments of the spine.

Health: A state of optimal physical, mental and social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebrae in the spinal column which causes irritation to the nervous system and interferes with the transmission of nerve impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of care we encounter non-chiropractic or unusual findings, we will advise you of those findings and recommend that you seek the services of another health care provider.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR PRIMARY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. OUR PRIMARY METHOD is specific adjusting to correct vertebral subluxations. However, we may use other procedures to help your body hold the adjustments.

I, _____ have read and fully understand the above statements.
(Print Name)

All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. Therefore, I accept chiropractic care on this basis.
